## 'InsideMetals.com' Expands WORLD VIEW of Gold Stocks, Adds 12 Junior Gold Companies to Its Popular Gold & Mineral Exploration Shopping Mall

RENO, Nevada, June 21 /PRNewswire-FirstCall/ -- InsideMetals.com, an internet website that provides easy access to a detailed WORLD VIEW of Gold Producer Stocks and Junior Gold Stocks for investors and financial experts, reported today that it has added 12 Junior Gold Companies to its Gold & Mineral Exploration Shopping Mall. The <http://www.insidemetals.com> website now includes 86 listed Junior Gold Stocks.

"InsideMetals.com" is organized to provide convenient worldwide access to detailed Gold Producer Stocks information for everyone, from the average investor to sophisticated stock brokers and fund managers," said Mike Mapa, Editor. "Insidemetals.com is fast and easy to use and is designed to save time for busy investors, fund managers, stock brokers, financial analysts, and government administrators who need organized, up-to-date information about Gold Producer Stocks."

InsideMetals' Gold & Mineral Exploration Shopping Mall makes it easier to find and obtain access to Junior Gold & Mineral Exploration Stocks. Junior Gold & Mineral Exploration Stocks are development companies, often without revenues, and are classified according to the stage of development of their property. The three development stages are: Prospector, Explorer, and Developer. The development stages are defined on the website at <http://www.insidemetals.com>.

The following classified Junior Gold Stocks have been added to the Insidemetals.com Gold & Mineral Exploration Shopping Mall. They are grouped where they are traded including the NASDAQ, the American Stock Exchange, the Over-the-Counter Bulletin Board, the Toronto Exchange and the Toronto Venture Exchange.

Junior Gold Prospectors added are Brett Resources Inc., and Romarco Minerals Inc., which are traded on the Toronto Venture Exchange; Liberty Star Uranium & Metals Corp., and Sterling Mining Company which are both traded on the Over-the-Counter Bulletin Board.

Junior Gold Explorers added are Almaden Minerals Ltd., and Kimber Resources Inc., which are traded on both the American Stock Exchange and the Toronto Exchange; Candente Resource Corp., and First Metals Inc., which trade on the Toronto Stock Exchange; Pacific North West Capital Corp., traded on both the Toronto Exchange and the Over-the-Counter Bulletin Board; Bonaventure Enterprises Inc. traded on both the Toronto Venture Exchange and the Over-the-Counter Bulletin Board; and Baja Mining Corp. traded on the Toronto Venture Exchange.

Junior Gold Developer added is Anaconda Gold Corp. traded on the Toronto Venture Exchange.

"This month we added four Prospectors, seven Explorers, and one Developer to our shopping mall which now features 86 Junior Gold Stocks," said Mike Mapa, Editor. "Fewer Developers will be added than Prospectors and Explorers because there are only a small number of companies with properties that have proven reserves and a completed feasibility study. The listing of Junior Gold Stocks according our classification allows investors to quickly view similarly classified companies via the links provided to each company's website, and stock symbol, and will make investment decisions in the Junior Gold Stocks segment much easier."

About InsideMetals.com

InsideMetals.com is an internet website that offers detailed value-added financial, production, and ore reserve information for key U.S. stock exchange listed gold, silver, platinum, and palladium producing companies.
